About me

Hi! I'm Nicolás and i'm very excited about starting my work experience in the IT field. I'm a Civil Engineer, specialized in BIM design with +9 years of experience as a site manager in multi-disciplinary projects.

A year ago I began to focus my knowledge and training towards programming, taking a Full Stack web development course, which sparked my curiosity and passion in the field.

Currently, I continue incorporating knowledge and putting my acquired skills into practice, while looking for an entry-level opportunity where I can develop, grow and contribute the best of myself.

Education

- **Hack Academy**
Montevideo, Uruguay
Mar 2022 - Oct 2022
- **PC Carrier**
Barcelona, Spain
- **UDELAR**
Montevideo, Uruguay
Mar 2008 - Mar 2016

Experience

- **Freelance**
3D Projects
2019 - Actual
- **Saceem**
Site manager
Oct 2017 - Actual
- **ATSH Steel**
Site manager
Oct 2016 - Oct 2017
- **Medina y Possamai**
Site manager
Jun 2016 - Sep 2016
- **Saceem**
Technical assistant
Abr 2015 - May 2016
- **IMM**
Technical assistant
Sep 2013 - Abr 2015

Full Stack developer

Front-End > HTML, CSS, JS, Bootstrap
Vue, React & React Native
Back-End > Node.js, Express, MySQL, MongoDB

3D BIM design specialist

Revit Architecture, Structure and Installations.
CYPE, concrete and steel structures design.

Structural Civil Engineer

3D projects design and modeling

Construction site management

- Civil works for extra high voltage substation
- UPM Port: Assembly of 7,000 tons of steel structure, 70,000 m2 roof steel sheet and installation of 1,000 m of rails for overhead cranes.
- Assembly of steel structure, panels and precast concrete at logistics hub project

- Supply control and site coordination for divers steel structure projects.

- Management of sanitation, pipe laying and sewerage works

- Site management support
- Surveys and calculations

- Road maintenance survey
